

Monthly Operating Support System (OSS) Report of Mobile Services

Bhutan InfoComm and Media Authority
Royal Government of Bhutan

February 2024

Contents

Background	3
Findings	3
(i) B-Mobile OSS	3
(ii) Tashi Cell OSS	4
Analysis	5

1. Background

The Authority collects the monthly system generated Mobile Operating Support System (OSS) report from the Telecom Operators and does reviews on the average Mobile Quality of Service (QoS). Based on the system generated Mobile OSS reports, the Authority decides the locations of physical verification or a drive test and carries out the Mobile QoS drive test to monitor and report the QoS regularly. The Mobile OSS report contains the mobile QoS for both voice and data services which are based on and measured through the various parameters of key performance indicators (KPI) of Mobile services of the 20 dzongkhags.

These OSS reports contain both operator's averaged Operation Support system (OSS) reports for the month of February 2024.

2. Findings

The results and findings of OSS system generated reports submitted by both the telecom operators are mentioned below:

(i) B-Mobile OSS

a. 3G

BTL monthly OSS report for February, 2024							
Sl. No	Region	CS drop rate (%)	PS drop rate(%)	CS success rate (%)	PS success rate (%)	DL user throughput(Mbps)	UL user throughput(Mbps)
1	Thimphu	0.15	0.41	99.75	98.47	2.84	0.45
2	Paro	0.13	0.39	99.77	98.61	2.93	0.48

20	Zhemgang	1.24	99.19	219.07	3.76

3. Analysis

- a. The download throughput for 3G is within the set standard except for the TICPL's download throughput at Gasa.
- b. The Upload throughput for 3G of both the telcos is below the standard in all Dzongkhags.
- c. The download throughput for 4G of both the telcos is within the set standard in all Dzongkhags.
- d. The Upload throughput for 4G of BTL is within the standard except for Punakha, Dagana, Zhemgang, Bumthang, Pemagatshel, Trashigang and Lhuentse. The Upload throughput for 4G of TICPL is below the standard in all Dzongkhags.
- e. The Download throughput for 5G of both the telcos is within the standard for all Dzongkhags.
- f. The Upload throughput for 5G of both the telcos is below the standard for all Dzongkhags.

- g. BTL clarified that the low upload throughput of 5G is due to less number of users uploading through 5G. If there is more upload traffic through 5G, there could probably be an accurate representation of the upload speed obtained by a user.
- h. TICPL mentioned that the 5G throughputs include the throughput obtained by 5G FWA in addition to 5G cellular users.
